

PRESEASON INSPECTIONS CHECKLIST

SIDEWALK VEHICLES

Suggested checkpoints during a preseason inspection include:

- ☐ Inspect machine for loose hardware or broken welds.
- ☐ Inspect hydraulic hoses for cracks, damage, or loose connections. Replace any damaged hoses.
- ☐ Check hydraulic fluid level.
- ☐ Check engine oil level and condition.
- ☐ Replace inline fuel filter.
- ☐ Replace air filter.
- ☐ Clean, inspect, and grease all electrical connections with dielectric grease.
- ☐ Inspect tires for damage and verify they are inflated to appropriate PSI.
- ☐ Ensure attachments are securely mounted. If the unit has a drop spreader, check that the snorkel kit is installed as recommended. *Per Service Bulliten SV011.
- ☐ Start machine and perform function tests.
