AUTO SPREAD CONTROL

BOSS SNOWPLOW

SPREAD SALT WITHOUT THE GUESSWORK

AutoSpread Control automatically maintains your set application rate as truck speed and spread width changes, so you always get the right amount of material on the ground.

Waste Reduction
Helps reduce material waste and over-application.

Simple Setup
Simple installation with no complex setup required.

Improved Control
Set and control application rates using the measurement that fits your operation. Per 1,000 Square feet, per acre, or per lane mile.

Standard Control [0-10 Feeder and 0-10 Spinner]

>

Rate Control [Based on material flow rate: 150lbs/min]

>

Auto Spread [Based on area ie 500lbs/acre: Adjusted by vehicle speed]
